

Space Needed For:

Day of Remediation-Math

The **Day of Remediation-Math** class helps students understand the importance of having a solid knowledge base of math facts in long-term memory *and then* learn how to construct this base by drills and directed exercises. The **DOR-M** is also a pre-requisite for the Female Math Course because, without a proper foundation, students could *never* hope to learn, in a period of eight weeks, the advanced math (polynomials, rational expressions, equations and inequalities, linear and quadratic functions, Euclidean and Cartesian Geometry, Probability and Statistics, etc.) they need to know to pass the TASC Mathematics subtest.

We're seeking space:

- for 50 students
- with cafeteria-like tables (so that the students can work in teams)
- near public transportation
- on two Saturdays a month (July 2017 – November 2017)
- from 7:00 a.m. to 5:00 p.m.

If you can help us in any way, please contact Allannah Thomas (Founder and Executive

Director) at allannahthomas@heliconinc.org
