Preface	i
Acknowledgement	ii
Introduction	1
Part I	
"Reading" a whole-inch measurement when the right edge of an object lies <i>on</i> a line and its left edge is:	7
A. aligned with the zero-line of the ruler	9
B. <i>not</i> aligned with the zero-line of the ruler	14
Part II	25
Reducing ruler fractions to lowest terms	
Part III	
"Reading" a fractional-inch measurement when the right edge of an object lies <i>on</i> a line and its left edge is aligned with the zero-line of the ruler	29
Part IV	
"Reading" a fractional-inch measurement when the right edge of an object lies <i>between</i> two lines and its left edge is aligned with the zero-line of the ruler	53
Part V	
“Reading” a fractional-inch measurement when the right edge of an object lies either <i>on</i> a line or <i>between</i> two lines and its left edge is:	71
A. aligned with the zero-line of the ruler	73
B. <i>not</i> aligned with the zero-line of the ruler	77
Part VI	81
Summary: Connecting fractions to the lines between the whole-inch numbers	
Part VII	
“Reading” a fractional-inch measurement in <i>feet and inches</i> when the left edge of an object is aligned with the zero-line of the ruler	95
